Thoughts for tutorial project

- Pie chart
- Tree map
- Barplot/lollipop

Pie chart
- lots of mixed opinions
- no direct function
    - have to make barplot circular
- more for basic visualizations
- not used that often to convey data
    - media
    - early data education
- within my skill set

Treemap
- Direct function in ggplot2
- Better visualization than pie chart
- ability to still be creative
- within my limited skill set

Barplot/lollipop
- Has been done in class before
- within my skill set
- good visualization
